

Defender Intermittent Cranking

Models LD - Defender

Title Defender Intermittent Cranking

Last Modified 26-NOV-2008 16:29

Category Electrical

Symptom 203000 Basic Electrical

Issue:

Warranty investigations have shown a number of repairs to Defender for intermittent loss of cranking.

Cause:

Content This issue may well be due to the immobilisation strategy on Defender.

Action:

Before conducting any work on a vehicle with this symptom, please view SSM 34184.
