

Models LD - Defender

Title Defender 07 My on Vacuum Pump  
replacement procedure change

Last Modified 22-MAY-2009 08:55

Category Chassis

Symptom 301000 Service Brake System

**Issue: Changes to service process  
Defender 2007my**

Methods engineers at Land Rover have recently studied the service process for renewal of the brake vacuum pump for Defender (LD) 2007MY onwards models (2.4 Puma).

In the new procedure the coolant fan is no longer removed and the battery is not disconnected.

Content Should it become necessary to renew the brake vacuum pump on Defender (LD) 2007MY onwards models (2.4 Puma), refer to the updated procedure on GTR section 206-07: Power Brake Actuation.

**Old Repair Time**

70.50.19 – Vacuum pump – brake booster –  
renew – 0.70hrs

**New Repair Time**

70.50.19 – Vacuum pump – brake booster –  
renew – 0.40hrs
