Title	Defender Bottle Jack Introduction
Last Modified	11-SEP-2008 12:19
Category	Chassis
Symptom	307000 Jack/Tool & Spare
Content	<p>Issue: Introduction of Bottle Jack for all Defender variants.</p> <p>Cause: The method of stowage for the Pillar type Jack along the bulkhead tended to produce a rattle type noise over irregular road surfaces. The introduction of the Bottle Jack and 3 piece handle allows storage of the all the Jacking components under the Left Hand Seat for an improved stowage installation.</p> <p>Action: No action required. This is a notification of change of supplied condition from vin. 9A768482.</p>
